For Sale: Thriving Engineering Consultancy with Turnkey Potential

Here's a unique opportunity to acquire a well-established engineering consultancy in Southeast Queensland. Ideal for new engineers eager to enter a dynamic industry, this business is a turnkey operation, ready for a seamless transition and immediate profitability.

Business Highlights:

- * **Comprehensive Service Offering:** The firm provides a wide range of engineering services, including structural, civil, geotechnical, hydraulic, and environmental engineering. Its integrated approach reduces the need for multiple contractors, enhancing project efficiency and client satisfaction.
- * **Ready-to-Run Business:** With three casual engineers and a network of skilled subcontractors, the business is fully operational, ensuring a smooth handover and ongoing revenue.
- * **Strong Financial Performance:** The business currently achieves an annual turnover of over \$200,000, offering a solid financial foundation for new ownership.
- * **Established Reputation:** Known for its integrity and quality service, the consultancy boasts strong client relationships, leading to high levels of repeat business and referrals.
- * **Growth Potential:** There are significant opportunities for expansion, the current owner has turned down substantial projects due to capacity limits, leaving room for new leadership to grow the business.
- * **Strategic Location:** Situated in a booming region, the company is well-positioned to capitalize on Southeast Queensland's ongoing housing and infrastructure development.

Our current owner is retiring, providing a fantastic opportunity to take over a business with a solid track record and ample room for growth.

This consultancy represents a superb investment for those seeking to enter or expand within the engineering sector. With its robust foundation, diverse service offerings, and strong market position, the business is poised for continued success and expansion under new leadership.
