Asking: **\$250,000**
Type: **Manufacturing**

Unique Manufacturing Opportunity

This unique lifestyle opportunity comes as a fully set up operation ready to relocate and start up.

This business was operating successfully in the booming recreational camping/boating market until ill-health forced its closure. The fully operational equipment, materials and all technical know-how is being offered for the first time. The product is vacuum molded from flat sheet plastic and all equipment required is included.

Key Features:

- Highly innovative designs - product is unique
- Purpose built equipment, tooling and molds
- Growing market in the recreational camping/boating sector
- Easily relocated and set up in new location
- Full training and set up assistance provided by Owners
- Self contained manufacturing operation
- Easy to run and maintain
- Low impact operation - requires no special licensing
- Equipment fully serviceable and in good condition
- Operation is being offered at a fraction of replacement cost
- Lifestyle opportunity for a Buyer interested in promoting recreational/outdoor products

To set up and run this operation you will need approximately 200m2 of workshop floor space plus suitable space for storage and handling of raw materials and finished goods. Ideally it would be run as a two person operation working as a team. A background operating equipment in a manufacturing environment would be an advantage.

Enquire now to discover more about this opportunity.
